

ONEKEY NEWSALERT

SEPTEMBER 2019

3 Chains Account for 26% of US Pharmacies, and Other Trends

Tracking changes and trends in pharmacy growth, personnel, ownership, and many other data points has become essential for understanding the healthcare market at large. Increasingly, pharmacies are becoming a primary provider for their clients who visit them for annual flu shots, common colds or allergies, and even some ambulatory care. Get this report to learn more about the top pharmacies.

ARTICLE

Patient Relationship Management Technology

Anyone who has been around for a while will remember how different healthcare was 40 years ago. Those were the days when most people saw a family physician for everything. Specialists worked at the local or regional hospital. Read more about

Register - Sept 12th

this changing technology.
