Acute Care and Psychiatric Facilities Dominate List of Top Hospitals
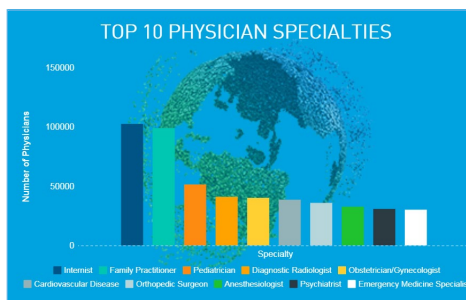

IQVIA, through its OneKey reference database operations, has identified hospitals in service in the U.S. under three facility types. This database is continuously updated and enhanced through a blend of primary research, transactional data, customer change requests, and trusted government and industry sources. Within the report you will find more about:

- Top 50 hospitals by bed count
- Top 25 occupations in hospitals
- Count of hospitals by state
- Hospital ownership
