

# OneKey Central Prescriber Validation

*A real-time check of credentials prior to adjudication*

## Protect your pharmacies from costly regulatory fines

As state and federal regulations governing prescription drugs and e-prescribing evolve, pharmacies today need a solution to reduce the potential for costly prescription fines and DEA audits. OneKey Central Prescriber Validation (CPV) is a real-time validation service with instant access to prescriber NPI and DEA credentials, state license information, state and federal sanction activity, and more.

### PHARMACIES CAN USE ONEKEY CPV TO:

- Validate prescriber or supervising prescriber NPI and DEA credentials
- Create customized prescriber exclusion or inclusion lists
- Determine if prescriber or supervising prescriber is on the OIG exclusions list
- Check for state regulations
- Verify if prescribers are approved to prescribe opiate treatments
- With premium version turn on crosswalk feature for deeper validations

Your #1 source for validating opioid prescriptions

Easy to integrate with any commercial pharmacy application

Save your reports to view transaction trends over time
